Dashboard / Reporting deadlines / Specification reminders

There is a new checkbox added in the heading line of the Todo specification of greetings and photo's. With this checkbox it is possible to select and deselect all lines on the screen to mark that the greeting letter/photo is sent to the donor. When all lines are selected it is still possible to deselect some lines of which the greeting letter/photo is not sent to the donor.

The problem that the acknowledgement messages were not visible if the buttons at the bottom of the screen were used is solved.

Quick search

When you now search for a child via quick search (above menu option Advanced Search where you can enter a child number or a child name) the child number and name will be added to the Last Opened list with children on the bottom left side of the screen.

Advanced search

The problem that search on classes was not possible is solved. When a "class from" is selected this is automatically the initial value for "Class until"

The problem with the search on status 99 history is solved. Also the code of the status is added to the selection box.

The selection of children with option Sponsoring / Only sponsored children is now the same as on the dashboard (status 1 (sent to donor) / 2 (accepted by donor) / 4 (Sponsored) / 5 (Sponsoring fund) / 7 (22+ supported))

Schools and classes / Totals of all schools

There is a new column added with the total number children with education only.

(Link "Send to W&D" is removed).

Child details / Greetings history

New column 1 or 2 to indicate if the greeting to the sponsor is the first or second greeting and column "Message" renamed in "Attachment" and this screen now only contains "Y" (to improve readability the "N" is no longer displayed)

Reporting / Education statistics

There is a new overview added (tab details E08) with the number of children that did not return at the start of the new schoolyear (see child leaving)

Type of education	Number of drop-outs who did not return at the start of the new school year			Percentage of drop-outs who did not return at the start of the new school year out of the total number of drop outs		
	Female	Male	Total	F	M	Total
PPE	0	0				
PE	0	0				
SE	0	0				
HE	0	0		0%		
...of which VE	0	0		0%		
Total	0	0	0	0%	0%	0%

Important information from the IRS:

- I The number of drop-outs includes only the students who dropped-out of education in the sponsorship program and **do not continue education** outside the sponsorship program. Drop outs which do not return at the start of the school year are counted as drop outs in the following reporting year (according to leaving date) but NOT included the number supported since they have not been to school in that school year.
- II Numbers filled in the table are **mean annual numbers**, which are calculated as: (numbers of persons at the start of the reporting year or course - which often will fall in the previous reporting year!) + (numbers at the end of the school year or course - which always falls in this reporting year), divided by 2.

General / Settings

New column "Schoolyear numerical" added (used in Education Indicators last 5 years)

General / dashboard

New column "Schoolyear" added and the remarks column is wider.

Overview Dashboard Rows			
Donor	Type	School year	Due date
Woord en Daad NL	Second greetings		31-12-2019
Woord en Daad NL	First greetings		31-07-2019

Problem solved that it was possible to enter a "new schoolyear" row for a non-existing schoolyear. Now only schoolyears can be selected from the selection box with predefined schoolyears.

Problem solved that it was possible to modify or delete dashboard rows that were already approved.

If the deadlines are not the same for all schools it is possible to add multiple dashboard rows (f.i. for the photos) with different due dates and then via button Schools it is possible to define which schools belong to the different due dates.

Details Rows Per School

School number	School name	<input type="checkbox"/> Selected
121	Test 121	<input checked="" type="checkbox"/>
122	Test 122	<input checked="" type="checkbox"/>
123	Test 123	<input checked="" type="checkbox"/>
124	Test 124	<input type="checkbox"/>
125	Test 125	<input type="checkbox"/>
127	test 127	<input type="checkbox"/>

If you enter a new dashboard row and there are exceptions at school level you can also check the option "Exceptions at school level". In this case the screen to select schools is activated automatically after saving the new dashboard row.
